

Artcare Restore

Fast, heat-activated mounting that is fully archival and reversible

Artcare Restore is an archival heat-activated foamboard that allows art to be reversed to its pre-mounting condition.

Ultimate Protection!

With Artcare Restore, you can safely reverse art to its exact, pre-mounting condition. The non-permeable adhesive meets all archival standards and can be completely removed from the art. Artcare Restore's breakthrough adhesive activates at low temperatures and short dwell times, making it safe for most art.

Fast and Easy!

Artcare Restore gives you the fastest, easiest and safest mounting option available. You can mount art in just 15-30 seconds on a mechanical press – or as little as 2 minutes in most vacuum presses!

Highest Quality!

Artcare Restore offers an ultra-smooth mount not achievable with other archival mounting methods. Artcare Restore offers a permanent mount that is reversible when reheating to 150°F and removing the art.

Archival Plus!

Artcare's patented technology actively protects art from the harmful effects of outgassing and from damaging pollutants – something no other foamboard can do!
