

# Bainbridge self-adhesive boards

## Bainbridge EasyMount

Our everyday self-adhesive board available in two sheet sizes and thicknesses.

Bainbridge EasyMount	sheet size	thickness	pack size
B622026	32" x 48" (812 x 1220mm)	1.5mm	10
B622046	32" x 48" (812 x 1220mm)	2.0mm	10
B622049	40" x 60" (1016 x 1524mm)	2.0mm	10

## Bainbridge Super

Our original self-adhesive boards offering distinct quality and performance advantages over most products in the market.

**Special Adhesive** Most self-adhesive boards offer you either a re-positionable quality but with no permanent bond, or a permanent quality but with no repositioning characteristics to help at the working stage. Bainbridge Self-Adhesive boards have a special 'self curing' adhesive that allows re-positioning of the artwork initially and forms a permanent bond after 24 hours. For framers, this provides the perfect combination of practical workability and ongoing durability, all in one product.

**Archival Adhesive** The adhesive on most self-adhesive boards is not archival and can yellow with age – permanently damaging your customers' artwork. Bainbridge self-adhesive boards use an archival adhesive which has been extensively tested in accelerated aging tests.

**Double Coated** The adhesive on Bainbridge boards is coated twice, once in each direction, to provide even tack levels right across the board and no 'dry spots' of poor adhesion.

**PH Neutral Components** Both the middle board and backing paper on Bainbridge self-adhesive boards are buffered to a neutral PH, whereas many of the other products available use acidic middle boards and/or backing papers.

BF5534	5mm Self Adhesive Black Foamboard 32" x 40"	25

## Bainbridge Speedmount

SpeedMount Heat-Activated Foamboard now makes dry mounting your artwork quicker than ever. You can mount paper art in just 15 seconds using SpeedMount and your mechanical press – or as little as 2 minutes in most vacuum presses! Simply size, tack and mount!

Pre-coated on one side with a new technologically advanced, heat-activated adhesive that is permanent, dry and tack-free, it is breathable and may be used for all types of mountings from porous paper to nonporous resin-coated (RC) photographs. Perfect for production and frame shops where mounting needs to be clean, fast and effortless. In addition, if removal is necessary, mountings can be removed easily with a heat gun or hair dryer!

This heat-activated dry mount foamboard may be used at 150°F – the lowest mounting temperature recommended in the industry today. Although SpeedMount is versatile in that it bonds at all temperatures between 150°F and 190°F, selecting lower temperatures limits adhesive absorption and makes dry mounting safer for many items. Some projects may require higher temperature settings and/or longer dwell times to ensure the best bond possible.

RMF4060.3C	40" x 60"	5mm	25 sheets

# Bainbridge Foamboards

## Bainbridge Regular

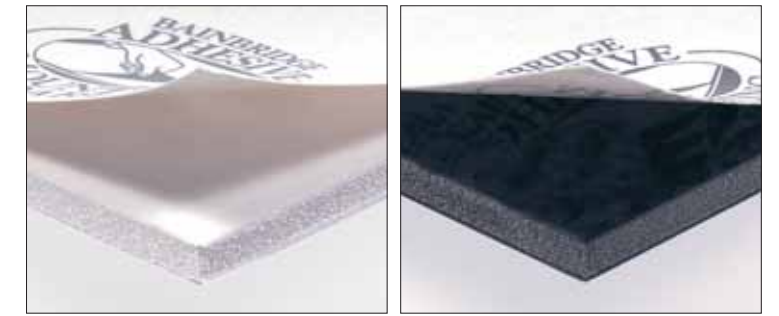

Bainbridge Foamboard is ideal for backing pictures, dry or wet mounting, large images and box and presentation frames. Bainbridge Foamboard is very stiff, flat and strong, providing an ideal base for mounting and backing images, yet is lightweight and cuts smoothly and cleanly with just a craft knife. Laminated both sides with smooth white paper, it has an extra-dense core to resist crushing, and the board is CFC free. Bainbridge Foamboard is available in pack quantities only.

Teichert Linen	33	5
Jumbo Teichert Linen (100 x 140cm)	2	5

### ATTENTION! SELF-ADHESIVE BOARDS

Most images are repositionable; however always test a small corner first. Special care should be taken if mounting thin papers and high gloss photographic papers. Store in dry conditions. Nielsen UK cannot accept responsibility for damage caused by environmental conditions beyond our control either before or after use.
