

pre-cut mounts

Our range of pre-cut mounts provide a design accent for photographs and other images, and all mounts fit one of our readymade frames. Our mounts are manufactured using the highest quality Bainbridge mountboard in either non-yellowing White Core, Black Core or Deep Bevel (2.5mm thick) Conservation quality.

Our range of hearts and multi-aperture mounts allows the presentation of photographs and other images as a framed collage. All our mounts are individually packed in clear cellophane, and labelled with frame size and aperture size.
