

snap frames

Snap frames offer a very fast and simple solution to sign and display requirements. The aluminium profile on each side simply snaps open on a spring hinge, allowing you to change contents quickly and with no tools or need to remove the frame from the wall.

All our snap frames include non-glare, non-yellowing styrene facing, use a gently curved 25mm frame profile and are available in Frosted Silver. They all include screws and plugs for wall fixing. For other finishes or special sizes please contact the sales office.
