

Nielsen Bainbridge Products

Mountboard

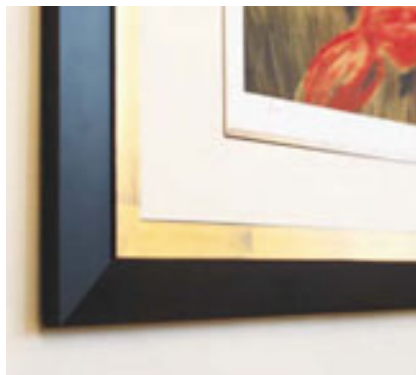

Bainbridge Mountboard has built a reputation as the finest quality and is manufactured in our own production plant.

With our exclusive **Artcare Mountboard** the framer now has access to mounts that can actively protect images from deterioration and significantly extend their life; a powerful consumer benefit to all framing with Artcare. Artcare board is much more effective even than traditional archival museum boards, and has been recognised in independent testing as the most effective material for extending the life of framed imagery.

“It puts us on a different level and gives us that edge over everybody else”

The Artcare website contains more information about framing with Artcare, its unique technology and its testing. www.artcaremountboard.co.uk

Moulding

Our moulding collection offers exceptional styling for a sophisticated and differentiated presentation.

Our **solid Aluminium** collection offers clean contemporary lines in a unique design statement. Ideal for today's sophisticated consumers and contemporary living and working spaces, these frames are made from high-quality brushed, matt and polished solid aluminium, in our own manufacturing plants.

In our **Exclusives wood moulding** collection the profile design and finish is carefully specified to incorporate classic and contemporary elements for a timeless, sophisticated presentation. Natural woods, modern veneers, wood tones, blacks, whites and metallics are all include, with a touch of creativity for a more individual presentation style.
