

Glass

Our market-leading, specialist anti-reflective glass, **ClearColour PLUS**, offers another major opportunity to develop value added sales. The unique manufacturing process used for ClearColour results in a superior quality glass that delivers exceptional consumer benefits and problem-free use in the workshop.

ClearColour glass is a speciality, coated picture framing glass designed to almost eliminate reflection and provide the perfect view of the framed image. ClearColour reduces reflection to less than 1% and has had almost all impurities removed for the most accurate colour rendition of the image. In addition, **ClearColour PLUS UV** adds the further benefit of protection from UV light and its potentially damaging effects to any image.

Readymade Frames

Nielsen Readymades are a vital retail product for today's framing professional and also offer an effective solution to contract and volume enquiries.

The **Nielsen brand of Readymades** has built a market-leading position through strong design and high quality manufacture that supports your reputation, and offers an unrivalled choice of style and size.

Solid aluminium frames, solid wood frames, table top frames, EcoCare, multi-aperture designs, the unique FrameBox for framing 3D items and shirts, clipframes, and mounts to fit, are all available in our unique collection.
